

CTILOAD prepares Xerox print resource files on z/OS

Program Description

CTILOAD is a component of the TelTape for z/OS software product, provided by Cartagena Software. CTILOAD transforms tape files created by Xerox printer controllers (using 'copy tape writelabel') into optimal z/OS datasets that can be used by CTI's PRO Meta family of products.

Features

- Can be run in batch or via ISPF panels
- MAP facility is included to display file names, file types, and block counts
- Automatically bypasses unneeded files
- Generates an optimal z/OS dataset that can be processed quickly
- Reports the filenames that were used or bypassed

How to order

Please contact Crawford Technologies Inc. if you require CTILOAD functionality. Visit www.crawfordtech.com.
